Full Stack Web Developer

I am a React 19 + TypeScript + Laravel 12 full-stack developer, retrained with a background in environmental sciences. Frontend UI/UX design and accessibility concepts are important to me, and I take pride in making solid digital products that satisfy client goals and are organized and maintainable, without adding unnecessary complexity. Always learning and growing as a developer, and having fun creating quality production-ready products.

WORK EXPERIENCE

Spilling Web **03/2025 - Present**
Full-stack web developer • Freelancer

I've delivered a enterprise-grade full-stack application and simpler info sites using modern tools. The products are made single-handedly by me, which shows commitment and that I take extreme ownership over my work, and that I have a can-do attitude. Always in close dialog with my customers, making the product they want and need, aiming for high customer satisfaction.

- Developed an enterprise-grade full-stack application for a municipality in Norway, implementing a modern stack with Laravel 12, Inertia.js, React 19, TypeScript, Leaflet, and CSS Modules (Delivered in December 2025).
- Designed and developed informational websites for two local companies in Fevik, Norway, focusing on performance optimization and user experience. Integrated a headless CMS using React 19, TypeScript, TanStack Start, Tailwind CSS, and TinaCMS, enabling autonomous content management for clients (Delivered in August 2026).
- Designed and developed a high-performance professional portfolio, leveraging Astro to optimize loading speed, content rendering, and web development best practices.

JOAO Software Solutions **09/2025 - 04/2026**
Full Stack Developer • Full-time **Cuenca, Ecuador**

- Led the frontend redesign and refactoring of a legacy accounting system, migrating the platform from CodeIgniter to a modern stack with React 19, TanStack, Tailwind CSS 4 and Laravel 12.
- Designed and implemented the new user interface architecture, optimizing the user experience (UX/UI) and actively participating in the development of backend features and RESTful API endpoints.
- Developed a comprehensive module for restaurants, creating a table ordering system and real-time kitchen notifications using WebSockets.

Ringerike municipality **08/2018 - 02/2022**
Environmental advisor • Full-time **Ringerike, Norway**

- I taught myself web development and built a web GIS application to keep track of information on properties, field work, and available environmental geodata. It is a full stack app that I modernized recently using React 19 and Laravel 12. It is still in use today.
- I participated in a DevOps process with the company Volue when our department needed more modern software. My colleagues and I created user stories and discussed necessary software features with the company.
- Gained valuable experience with GIS.
- Collaboration across various disciplines, meeting with the community, and making presentations.

Sam Eyde videregående skole **10/2024 - 06/2025**
High School Teacher • Part-time **Arendal, Norway**

- Worked as a substitute high school teacher while developing my skills in web development. Subjects include Natural Sciences, Mathematics, Spanish and English.

NMBU - Norwegian University of Life Sciences **09/2016 - 05/2017**
Assistant teacher of University Statistics **Ås, Norway**

Various **06/2007 - 08/2026**
Seasonal and part-time jobs

- I've worked gardening cemeteries, waited in a local coffee shop and bakery, sold books, collected environmental field data, worked in a home for people with disabilities and in a nursing home.

EDUCATION

One-year degree in Information Technology

University of South-Eastern Norway • GPA: A- Online • 08/2022 - 05/2024

A university degree focused on learning the fundamentals of computer science and software engineering using agile methodologies, along with database management. Courses include: Basic programming in Java • Web development and design • Digital business strategy and information systems • Database management • E-business and Social Media • Information security • Windows server and networks • Software engineering

Bachelor and Master of Science in Environment and Natural Resources

Norwegian University of Life Sciences (NMBU) • GPA: B+ Ås, Norway • 08/2011 - 06/2018

Mainly natural science and environmental courses, some introductory courses in programming and GIS. My Masters degree was heavy on the statistical side, and during my thesis work I spent 2 semesters programming in R, developing predictive models using machine learning methods. Link to my MSc thesis: https://nva.sikt.no/registration/01990aba65e1-7ee81760-7c5b-4379-8cce-b978f610bba4

Degree in Spanish Language and Literature

Østfold University of Applied Sciences • GPA: A 08/2014 - 06/2015
